

Scenario Name

File Upload

Weak Prompt

Generate test cases for file upload.

What I Feel is Missing

1. *Limited Coverage- Covers only common upload scenarios.*
2. *Missing Test Design Techniques*
 - No Boundary Value Analysis.*
 - No Decision Table Testing.*
 - No Pairwise Testing.*
3. *Missing Reliability Scenarios- No browser refresh, server restart, retry, or session timeout tests.*
4. *Limited Compatibility Testing- Minimal browser/device coverage.*
5. *Less Enterprise-Focused - Lacks recovery, integrity, versioning, and infrastructure-related scenarios.*

Instruction

[MANDATORY] Create test cases with all possible combinations of file upload.

[Mandatory] Use all test design techniques to cover all the combinations to ensure maximum coverage.

[Mandatory] Include all positive and negative test cases.

[Mandatory] Include functional and non functional test cases.

CContext

Act a as a senior test engineer and create test cases for file upload.

EExample

Provide the test cases in below format

TC Id | Test case description| Preconditions | Priority | Test Step count | Test Step | Expected Result |

PPersona

Review by act as a Test manager to validate the quality of test coverage.

Output Format

Downloadable Excel file

Tone

Professional tone with no ambiguity in the test cases

✓ Rewritten Prompt

Context:

Act as a senior test engineer and create test cases for file upload.

Instructions:

[MANDATORY] Create test cases with all possible combinations of file upload.

[Mandatory] Use all test design techniques to cover all the combinations to ensure maximum coverage.

[Mandatory] Include all positive and negative test cases.

[Mandatory] Include functional and non functional test cases.

Example:

Provide the test cases in below format

TC Id | Test case description | Preconditions | Priority | Test Step count | Test Step | Expected Result |

Persona:

Review by act as a Test manager to validate the quality of test coverage.

Output:

Downloadable Excel file

Tone:

Professional tone with no ambiguity in the test cases

Observations

- *More Comprehensive Coverage*

 - 80 test cases vs 52 test cases.*

 - Covers many additional real-world scenarios.*

- *Includes Advanced QA Techniques*

 - Boundary Value Analysis (max-1, max, max+1).*

 - Decision Table Testing.*

 - Pairwise Testing.*

 - These improve defect detection significantly.*

- *Better Reliability Testing*

 - Slow network, session timeout, browser refresh, server restart, retry scenarios.*

- *Better Compatibility Coverage*

 - Different browsers and devices are covered.*

- *Better Security Coverage*

 - Encryption at rest and in transit.*

 - Additional validation scenarios.*

- *Better Production Readiness*

 - Covers storage limits, recovery, integrity checks, versioning, and download verification.*
